

Name: Saurabh Haribhau Patil.
Designation (Grade): Analyst (A4).
Role: Software Engineer.
Mobile Number: 9370328583
Email: PatilSaurabh9978@gmail.com

SUMMARY

- Working as a Software Engineer with Capgemini, Hyderabad from April 2023 to till date.
- Worked on JEE Full-Stack with Angular (2.0) during Capgemini training.
- Created project by using Spring Tool Suite and Visual Studio Code.
- Ability to learn and adapt new technologies quickly.
- Good analytical, verbal, written communication and interpersonal skills.

EDUCATION AND CREDENTIALS

- Bachelor of Technology, Padmabhooshan Vasantraodada Patil Institute of Technology, **Budhgaon, Sangli** .

TECHNICAL PROFICIENCIES

Technologies	Salesforce ,Spring Boot, HTML,CSS,JS, Angular, TypeScript
Platforms	Spring Tool Suite, Angular, Trailhead
Applications / IDE	Eclipse, Visual Studio Code, Spring Tool Suite
Project	Spring Boot, Angular, Salesforce Admin

Technical Skills

- **Salesforce Administration:** Proficient in Salesforce setup, configuration, and customization. Experience in managing users, profiles, roles, and permissions.
- **Salesforce Platform Developer I (PD1):** Proficient in Apex programming language, demonstrating the ability to write and optimize Apex classes, triggers, and batch processes. Experience in adhering to best practices and design patterns for efficient and maintainable code.
- **Lightning Web Components (LWC) Development:** Skilled in developing Lightning Web Components (LWC) to create dynamic and responsive user interfaces within the Salesforce platform. Proficient in leveraging LWC's modular architecture, encapsulation, and reusability to build efficient and maintainable components.
- **Java Programming:** Expertise in developing and maintaining enterprise-level applications.
- **Spring Framework and Spring Boot:** Experienced in utilizing these technologies to create scalable

and efficient applications.

- **Typescript Proficiency:** Skilled in building robust and maintainable front-end applications using Typescript.
- **Dynamic Web Applications:** Develops dynamic web applications using the AngularJS framework.
- **SQL Database Management:** Proficient in working with SQL databases for effective data storage and retrieval.
- **C Language Familiarity:** Knowledge of the C language for low-level programming tasks and system-level development.

PROFESSIONAL EXPERIENCE

HR Resource (Human Resource Management):

Role: Developer and Team Lead

Project Description

The HR resource (Human Resource Management) is a system designed for the HR department of Capgemini. It stores employee salary and designation details year-wise, including promotions and salary appraisals. The admin can perform various operations, including managing employee data, departments, promotions, and more. The Employee role allows for actions like updating personal information and querying specific employee details. The system facilitates tasks like tracking employee promotions, assigning departments, managing salaries, and generating reports for different purposes.

To ensure data accuracy and reliability, stringent data integrity measures have been incorporated. Rigorous testing protocols have been employed, leveraging industry-standard tools such as JUnit and Mockito. This testing framework ensures the robustness and dependability of the system, validating its functionality under various scenarios and conditions.

Platform: STS and VS Code

Responsibilities:

- Requirement gathering, project estimation, planning & execution
- To create the backend and frontend along with various required layers.
- To design the html various components and adding extra features to it using angular.

RecruiterPro App:

Role: Salesforce Administrator and Salesforce Development

URL - <https://curious-caramel-dd2335.netlify.app/homepage>

Project Description:

RecruiterPro is a comprehensive Salesforce application tailored for the candidate hiring process. The app streamlines and enhances the recruitment workflow, allowing for efficient candidate management from application to On-boarding. It incorporates Salesforce admin features to ensure smooth data handling and customization capabilities.

Moreover, RecruiterPro prioritizes security measures to safeguard sensitive candidate and recruitment data. Robust encryption protocols, secure authentication processes, and role-based access controls are implemented to ensure the confidentiality and integrity of information. The application adheres to industry-leading security standards

Platform: Salesforce.com

1. User Registration:

- Allow recruiters or administrators to register new users within the system.
- Capture necessary information during registration, such as name, email, and role.

2. Login Authentication:

- Implement a secure authentication mechanism to verify user credentials during login.
- Leverage Salesforce's built-in authentication features or implement a custom authentication process.

3. External User Registration via Web Forms: Develop web forms accessible from outside the system, allowing users to register easily. Implement robust security measures to ensure the integrity of user data and prevent unauthorized access.

Training & Certifications

1. JEE Full Stack with Angular (2.0) Training by Capgemini, Hyderabad.
2. Salesforce Admin and App Builder Training By Capgemini, Hyderabad.
3. Salesforce Lightning web Component Training By Capgemini, Hyderabad.
4. Salesforce Certified : **Administrator**
5. Salesforce Certified : **Platform Developer I**
6. HackerRank (Basic Java and Problem Solving Java) .
7. Agile Software Development certification on Coursera.
8. Salesforce Admin and App Builder certified (Udemy)
9. Salesforce Developer (PD 1) certified (Udemy)
